

A hand in a black sleeve points towards a glowing white object inside a black bag. The bag has a strap with the XPLIGHT logo. The scene is dark, with the white object being the primary light source.

FAST. LIGHT.
EVERYWHERE.

XPLIGHT®
BY CARPETLIGHT

RELIABLE LIGHT WHENEVER YOU NEED IT

At night or while operating in hard to reach places the lack of reasonable lighting conditions is a severe obstacle. XPLights by CARPETLIGHT are extremely flexible and robust LED lamps for the shadow-free multidirectional illumination of rooms and outdoor areas. Ready to use in seconds, XPLights can be fixed to any object from backpacks to vehicles, walls or tents. Moreover XPLights are waterproof and virtually indestructible. Light you can rely on when others rely on you.

Unique: XPLights are like a luminous cloth – easy to handle, lightweight and highly flexible

In use by the combat swimmers of the German Bundeswehr, tested by the US Navy SEALs

While torches only provide an unidirectional light cone XPLights illuminate rooms and outdoor areas with bright planer light

- Highest color rendition (CRI 95)
- Patented technology
- Made in Germany
- Winner of the Bundeswehr Innovation Award 2020

XPLIGHT ALPHA & XPLIGHT ALPHA PLUS

Small enough to fit in a pocket, powerful enough to illuminate an entire room without glare. In the Alpha plus version, XPLights are switchable between white, red and infrared light.

Features & options:

- Internal battery
- USB-C port
- Compatible with USB-powerbanks
- Mounting with velcro, magnets, eyelets and MOLLE
- Virtually indestructible
- Waterproof

In the field XPLights can be mounted practically everywhere

XPLights reliably work in adverse weather conditions

The infrared mode of XPLights allows operations with night vision

XPLights provide equally bright working light in red light mode

Being compressible and rollable XPLights can be stowed away in the smallest of spaces

XPLights offer different mounting options: MOLLE, velcro, magnets, eyelets/carbines and more

Specs XPLight Alpha / Alpha Plus:

-  35 x 10 cm
-  225 g
-  5 V
-  7 W
-  800 lm
-  white: 250 lx / 1 m

XPLIGHT XP-M & XPLIGHT XP-M1

The perfect lighting solution for larger outdoor areas and indoor spaces. For tactical use, flashing patterns can be programmed and controlled directly or using smart devices.

Features & options:

- Series connection
- Controllable via app
- Switchable light modes and programmable flashing patterns
- Wide range of input voltage from 5 volts (USB-C) to 30 volts
- Mountable with velcro, magnets, eyelets, MOLLE
- Torsionable, compressible and rollable

In the red light mode XPLights prevent interruption of the dark adaptation

Rooms that lack light sources and power are brightly illuminated by XPLights

XPLights can easily be fixed to vehicles as well

Light modes and flashing patterns are controllable via App

For the illumination of larger rooms XPLights can also be serially connected

Specs XPLight XP-M / XP M1:

↑ cm 62 x 24 cm

kg 500 g

⚡ 1,6 A @ 5 V USB-C (limited)
2 A @ 12 V / 1 A @ 24 V

⚡ 25 W

☀️ 1400 lm

☀️ white: 500 lx / 1 m
☀️ white: 1 lx / 1 m (lowlight-mode)

XPLIGHTS OVERVIEW

| | XPLight Alpha | XPLight Alpha Plus | XP-M | XP-M1 |
|---|---------------|--------------------|------------|------------|
| Dimensions | 35 x 10 cm | 35 x 10 cm | 62 x 24 cm | 62 x 24 cm |
| Weight | 225 g | 225 g | 500 g | 500 g |
| Lumen | 800 | 800 | 1400 | 1400 |
| Lux / 1 m | 250 | 250 | 500 | 500 |
| red light and infrared light selectable | | ✓ | | ✓ |
| Series connection | | | ✓ | ✓ |

Luminous intensity in comparison:

XPLight Alpha has the luminous intensity of a 60W light bulb

XP-M delivers the double intensity of two 60W light bulbs

XPLIGHT TENTACLE SYSTEM

As a complete solution, the XPLight TenTacle system provides permanent lighting installation in mobile units such as medical tents or mobile quarantine stations. The TenTacle system can be flexibly combined and thus adapted to the respective lighting requirements.

Features & options:

- White- and red light
- Centrally controllable
- Controllable via App
- Different light modes switchable and programmable
- Mounting with velcro, magnets, eyelets, MOLLE
- Expandable modular system
- Torsionable, compressible and rollable
- Waterproof

Maximum time saving: with the use of XPLights in air-supported tents, the complex installation of lighting systems is completely eliminated

The lights become an integral part of the inner tents and only need to be supplied with power

Individual lighting module of the TenTacle system

Tents with one chamber can be equipped with one or multiple rows of lamps supplied by a central power supply or batteries. The intensity and colour can be adjusted with a dimmer.

Example 1

Both dimensions and mounting options are variable and customisable

In multichamber tents a lighting system of multiple rows can be utilised. The system can be divided up using an optional splitter.
